

Career Technical Education (CTE) is a proven strategy that expands options for learners, empowers them to choose a meaningful and sustainable career, and prepares them with real-world skills for success in college and careers. Through hands-on learning, engagement with industry experts and rigorous academic and career-focused coursework, CTE is learning that works for Kansas’ students – and its economy.

## CTE Works for Learners in Kansas

### CTE Enrollment<sup>1</sup>

**71,109**

High School

**20,089**

Postsecondary

### High School Graduation

**86%**

Kansas Average<sup>2</sup>

**99%**

CTE Concentrators<sup>3</sup>

## Outcomes for Learners in Kansas<sup>4</sup>

**93%**

high school CTE graduates enrolling in college, enlisting in the military or working within six months

**74%**

postsecondary CTE students staying enrolled and/or transferring

**74%**

postsecondary CTE students earning a credential, certificate or degree

**83%**

postsecondary CTE graduates placed in careers or further training within six months

- Fun fact: Industry credential attainment has more than doubled since 2011 through the Kansas Excel in CTE program, which provides funding for certification examinations and dual credit tuition.<sup>5</sup>

## CTE Works for Kansas’ Economy

- Middle-skill jobs – those requiring some postsecondary education and training, but not a Bachelor’s degree – account for 55 percent of Kansas’s labor market.
- However, only 45 percent of workers in Kansas are qualified to fill these middle-skill jobs,<sup>7</sup> leading to a skills gap that CTE can help address.
- In total, 23,561 associate’s degrees or certificates were awarded in Kansas in 2015 – about 44 percent of all postsecondary degrees and certificates.<sup>8</sup>

In Kansas, the top middle-skill occupations with the highest projected job openings are in the Health Science Career Cluster.<sup>6</sup>
