

Career Technical Education (CTE) is a proven strategy that expands options for learners, empowers them to choose a meaningful and sustainable career, and prepares them with real-world skills for success in college and careers. Through hands-on learning, engagement with industry experts and rigorous academic and career-focused coursework, CTE is learning that works for Oklahoma’s students – and its economy.

CTE Works for Learners in Oklahoma

Outcomes for Learners in Oklahoma⁴

93%

high school CTE graduates enrolling in college, enlisting in the military or working within six months

71%

postsecondary CTE students staying enrolled and/or transferring

49%

postsecondary CTE students earning a credential, certificate or degree

70%

postsecondary CTE graduates placed in careers or further training within six months

- Fun fact: Oklahoma has a large Native American population and has focused deliberately on addressing the needs of those learners. Both the secondary and postsecondary education agencies employ a full-time staff member to liaise with the state’s 39 tribes.⁵

CTE Works for Oklahoma’s Economy

- Middle-skill jobs – those requiring some postsecondary education and training, but not a Bachelor’s degree – account for 55 percent of Oklahoma’s labor market.
- However, only 47 percent of workers in Oklahoma are qualified to fill these middle-skill jobs,⁷ leading to a skills gap that CTE can help address.
- In total, 26,333 associate’s degrees or certificates were awarded in Oklahoma in 2015 – about 47 percent of all postsecondary degrees and certificates.⁸

In Oklahoma, the top middle-skill occupations with the highest projected job openings are in the Health Science Career Cluster.⁶
