

New Hampshire

- Developing common standards is essential to the creation of dual credit programs – including textbooks and assessments.
- Industry approved the program competencies (standards) that provided the framework for the assessment.
- Postsecondary partners are very supportive of the process of developing dual credit and rigorous standards which reduces the need for remediation.

- The dual credit program at our community college system is recognized throughout the state.
- Value of Statewide Agreement – it offers students multiple options for transcribed credit within the community college system and two four-year colleges
- End-of-Program assessment(s) are essential for determining student readiness for postsecondary work. The maintenance cost of the assessment is a challenge for our state.
- Professional development is on-going and includes guidance, parents, faculty, administrators and postsecondary admissions and academic affairs personnel.
